ELSEVIER

European Journal of Operational Research 122 (2000) 656–658

EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

www.elsevier.com/locate/orms

Contents Volume 122

1 Optimization methods for the planning of rapid transit systems
G. Laporte, J.A. Mesa and F.A. Ortega

11 An efficient transformation of the generalized vehicle routing problem
G. Ghiani and G. Improta

18 A two-phased approach to the supply network reconfiguration problem
A.D. Ross

31 Comparison of neural network models with ARIMA and regression models for prediction of Houston's daily maximum ozone concentrations
V.R. Prybutok, J. Yi and D. Mitchell

41 A review of manufacturing flexibility
R. Beach, A.P. Muhlemann, D.H.R. Price, A. Paterson and J.A. Sharp

58 A class of optimization problems over the efficient set of a multiple criteria nonlinear programming problem
N.V. Thoai

69 Order relations among the optimal values under three evaluation criteria and their applications
X. Li, G. Yamazaki and K. Iimura

79 Establishing dominance between alternatives with incomplete information in a hierarchically structured attribute tree
S.H. Kim and C.H. Han

91 Bi-criteria utility functions: Analytical considerations and implications in the short-run labour market
C. Romero

101 Expected utility maximization of optimal stopping problems
A. Muller

115 Computation of noncooperative equilibria in ordinal games
C. Xu

123 A sampling procedure to estimate risk probabilities in access-control security systems
S.H. Jacobson, J.E. Kobza and M.K. Nakayama

133 A moment based metric for 2-D and 3-D packing
J.K. Dickinson and G.K. Knopf

145 Symmetric duality with pseudo-invexity in variational problems
C. Nahak and S. Nanda

151 A field study of sales forecasting accuracy and processes
M. Lawrence, M. O'Connor and B. Edmundson

161 A note on pseudo-invexity and duality in nonlinear programming
S. Chandra and Abha

0377-2217/00/$ - see front matter © 2000 Elsevier Science B.V. All rights reserved.
PII: S0377-2217(00)00030-8

PII: S0377-2217(00)00030-8

166 A note on splitting of variables in integer programming models
A. Volgenant
173 Book Review
H. Fleuren (ed.)

175 Advances in modeling: Paradigms, methods and applications
M. Makowski and H.-J. Sebastian
178 Complex systems analysis and environmental modeling
Y. Nakamori and Y. Sawaragi
190 An application-oriented view of modeling uncertainty
H.-J. Zimmermann
199 Integrated model management in the data warehouse era
D.R. Dolk
219 Modeling paradigms applied to the analysis of European air quality
M. Makowski
242 Building agent-based corporate information systems: An application to telemedicine
T. Bui
258 Cooperative game solution concepts to a cost allocation problem
L. Kruś and P. Bronisz
272 Service network design in freight transportation
T.G. Crainic
289 Planning models for long-haul operations of postal and express shipment companies
T. Grünert and H.-J. Sebastian
310 A multi-depot pickup and delivery problem with a single hub and heterogeneous vehicles
S. Irnich
329 Modelling multi-stage manufacturing systems for efficient scheduling
C. Charalambous, T. Tahmassebi and K. Hindi
339 A novel decomposition approach for on-line lot-sizing
E.H.L. Aarts, M.F. Reijnhoudt, H.P. Stehouwer and J. Wessels
354 Modelling and simulating multi-echelon food systems
J.G.A.J. van der Vorst, A.J.M. Beulens and P. van Beek
367 Using recipe classes for supporting detailed planning in food industry: A case study
I.H.G. Houba, R.J.M. Hartog, J.L. Top, A.J.M. Beulens and L.N. van Berkel
374 Inequality measures and equitable approaches to location problems
W. Ogryczak
392 Estimation of embodied CO_2 emissions by general equilibrium model
M. Kainuma, Y. Matsuoka and T. Morita
405 Analysis of recycling activities using multi-sectoral economic model with material flow
T. Masui, T. Morita and J. Kyogoku
416 The AIM/end-use model and its application to forecast Japanese carbon dioxide emissions
M. Kainuma, Y. Matsuoka and T. Morita
426 EMEP Eulerian acid deposition model and its applications
K. Olendrzyński, E. Berge and J. Bartnicki
440 A simplified ozone model based on fuzzy rules generation
M. Ryoke, Y. Nakamori, C. Heyes, M. Makowski and W. Schöpp
452 A system approach to management of catastrophic risks
Y.M. Ermoliev, T.Y. Ermolieva, G.J. MacDonald, V.I. Norkin and A. Amendola

461 Modeling and analysis of decision making problem for mitigating natural disaster risks
H. Tamura, K. Yamamoto, S. Tomiyama and I. Hatono
469 Interactive specification and analysis of aspiration-based preferences
J. Granat and M. Makowski
486 Multicriteria analysis for agricultural resource management: A critical survey and future perspectives
K. Hayashi
501 Utilization of artificial neural networks and the TD-learning method for constructing intelligent decision support systems
N. Baba and H. Suto
509 Assignment of program modules to processors: A simulated annealing approach
Y. Hamam and K.S. Hindi

515 Warehouse design and control: Framework and literature review
B. Rouwenhorst, B. Reuter, V. Stockrahm, G.J. van Houtum, R.J. Mantel and W.H.M. Zijm
534 Projections of the capacitated network loading problem
P. Mirchandani
561 Upper and lower bounding procedures for minimum rooted k-subtree problem
S. Kataoka, N. Araki and T. Yamada
570 Optimization over the efficient set of a parametric multiple objective linear programming problem
T.V. Tu
584 A multi-period profit maximizing model for retail supply chain management: An integration of demand and supply-side mechanisms
S. Bhattacharjee and R. Ramesh
602 An optimal algorithm for solving the 1-median problem on weighted 4-cactus graphs
Y.-F. Lan and Y.-L. Wang
611 A new dual based procedure for the transportation problem
R.R.K. Sharma and K.D. Sharma
625 On the value of an item subject to general repair or maintenance
M. Scarsini and M. Shaked
638 An empirical study of isolating mechanisms in UK companies
M. Oktemgil, G.E. Greenley and A.J. Broderick
656 Contents Volume 122
